JORD-N STUBBS
GRAPHIC DESIGNER

To whomever reads:

Graphic Design has always been a liking of mine; however, I've decided to professionally pursue a career in it. Now I believe in precision and focus in my work, down to the last pixel.

As a designer, I have favored logo design and branding. However, using my self-taught skills in Adobe Photoshop and Illustrator (since CS2 - Windows), I am capable of producing much more. I have made flyers, logos, brochures, advertisements, and other paraphernalia for organizations in The Bahamas such as The Bahamas National Youth Council (BNYC), The Bahamas Red Cross, and SASH Bahamas.

When I was still a budding designer, I was taught that being a designer is not just about designing. Another key element is education - you must not just design for the client, you must educate them. In my short space of time of working with multiple clients in a certain period, I have been able to use this to my advantage.

Graphic designing is a social career. I have profiles on many of the widely-known social sites (Facebook, Instagram, Google+); many of which I have garnered contacts that can either help critique my work, or I critique theirs.

Graphic design is my passion. I am always trying to stay creative and build upon the knowledge I have now. I aspire to earn a degree in Graphic Design in the near future. I know that my potential and skills will speak for me in my career. I want to add my style infuse my skills, and immerse myself into your company.

Sincerely yours,

Jord-N Stubbs
