

Titiana Barclay | Graphic Designer

Just a small summary...

Being a graphic designer has allowed me to create publications that represent me, my eccentric personality and my surreal designs. My artistic journey began at a very young age; my mother says that as a child I could always draw the most perfect smiley faces. With having a background in the fine arts field, I am able to use my sense of color theory, illustrations, and love for experimenting with different art styles, to advance my graphic design skills. When designing, whether it be logos, posters or publications, my approach is exactly how I would tackle a blank canvas. First, you need the idea, think big, start sketching and go wild.
